

How To Help Your Child Succeed In School

1.) Organization

- encourage a binder which is organized in a system that works for your child
- help them to lead a balanced life which includes extracurricular activities and fun with friends, but which also includes schoolwork as a high priority
- monitor daily organization by encouraging use of the school agenda for more than just holding pictures and phone numbers of friends

2.) Review and Study Skills

- limit distractions for homework and study time
- periodically check to see if assignments are being completed
- look at the quality of the assignments and encourage your child to put forth their best effort in all that they do

3.) Additional

- help instil the value of learning rather than just the collecting of marks
- assist them to recognize the value of process as well as content
- encourage them to ask and answer questions in class and actively participate in all activities (let their grade 3 come out!)
